Dynamics Days Arizona 1993**

ONR Grant Number N00014-93-1-0087

Period: January 5-9, 1993

Dynamics Days 1993 was organized by Eric Kostelich (Dept. of Mathematics, Arizona State University) and Robert Behringer (Dept. of Physics, Duke University). Other members of the organizing committee included Dieter Armbruster and Peter Crouch from Arizona State University. Meeting arrangements were made by Dr. Kostelich with assistance from the administrative staff in the ASU mathematics department. The workshop was held at the Tempe Mission Palms Hotel at the corner of Fifth Street and Mill Avenue in downtown Tempe.

This workshop attracted 230 participants, including 20 invited speakers, 30 contributed talks, and nearly 100 poster presentations. The program and the list of posters are attached.

A new feature of the 1993 program was the addition of a short course on chaotic dynamics, given on Tuesday, January 5, 1993 by James A. Yorke and Celso Grebogi of the University of Maryland (they were also invited speakers for the Dynamics Days workshop.) The morning program was conducted by Dr. Grebogi and covered the basic ideas of chaos: sensitive dependence on initial conditions, fractals, strange attractors, and the like. The afternoon program featured Dr. Yorke, who discussed the analysis of chaotic experimental time series. Topics included attractor reconstruction, noise reduction, short-term prediction, and control of chaos. The short course attracted some 80 people, about two-thirds of whom were graduate students.

Some of the scientific highlights of the conference included talks on the control of chaotic experiments (C. Grebogi, U. of Maryland; R. Roy, Georgia Tech, R. Rollins, Ohio U., M. Spano, NSWC) and tracking unstable periodic

orbits as a parameter is changed (I. Schwartz, Naval Research Lab). Another focus of the meeting was pattern formation in physical systems. Alan Newell (U. of Arizona) discussed patterns in optics; I. Epstein (Brandeis) considered chemical patterns; and A. Winfree (U. of Arizona) discussed patterns in excitable media. There were about 180 attendees for the actual conference (some people attended both the short course and the conference).

The ONR grant of \$15,000 was crucial to the success of the meeting. The ONR funds provided travel and lodging support for the invited speakers as well as \$2500 in partial scholarships for graduate students and postdocs. (Approximately \$7,000 in support of the conference came from Arizona State University. These funds provided support for ASU graduate students to attend the short course and conference, and they also paid for postage and miscellaneous expenses. The remaining funds came from meeting registration fees.)

Dynamics Days 1994 is being organized by Robert Behringer (Dept. of Physics, Duke University, Durham, NC) and Eric Kostelich. The conference is scheduled for Jan. 5-8, 1994 at the Durham Omni Hotel in Durham, North Carolina.

WEDNESDAY, JANUARY 6

Conference begins

CHAIR: ERIC KOSTELICH

8:45 - 9:00 Opening remarks

R. Barnhill (Vice President for Research, Arizona State University)

M. Shlesinger (Director, Physics Division, Office of Naval Research)

9:00 - 9:45 A. Newell (Univ. of Arizona), *Dynamical patterns**

9:45 - 10:05 W.-J. Rappel (CNRS and Univ. of Paris), *Dynamics of the globally-coupled complex Ginsburg-Landau equation*

10:05 - 10:25 H. Greenside (Duke), *Does a power-law power spectrum imply self-affinity?*

10:25 - 11:15 Poster session 1

CHAIR: ERIC KOSTELICH

11:15 - 12:00 C. Grebogi (Univ. of Maryland), *Using time series for feedback control of chaotic systems**

12:00 - 1:00 Lunch

CHAIR: BOB BEHRINGER

1:00 - 1:45 R. Roy (Georgia Tech), *Nonlinear dynamics of a solid state laser system: from chaos to control**

1:45 - 2:05 I. Schwartz (Naval Research Lab), *Tracking unstable periodic orbits in experiments: a new continuation method*

2:05 - 2:25 M. Muldoon (Univ. of Warwick), *Topology from time series*

2:25 - 3:15 Poster session 2

CHAIR: HARRY SWINNEY

3:15 - 4:00 I. Epstein (Brandeis), *Recent studies of Turing patterns**

4:00 - 4:20 R. Rollins (Ohio University), *Controlling chaos in highly dissipative systems*

4:20 - 4:40 A. Huebler (Illinois), *Optimal control of chaos*

4:40 - 5:00 M. Silber (Caltech), *Spatially and temporally periodic pattern formation in euclidean equivariant systems*

5:00 - 5:20 S. Natsiavas (Arizona State Univ.), *Local bifurcations and modal interactions in a mechanical model of metal cutting chatter*

5:20 - 7:30 Dinner

CHAIR: ERIC KOSTELICH

7:30 - 8:15 N. Gershenfeld (MIT), *Predicting the future and understanding the past: results from the Santa Fe Institute time series competition**

8:15 - 9:00 S. Kauffman (Santa Fe Institute), *Co-evolution to the edge of chaos**

THURSDAY, JANUARY 7

CHAIR: PETER CROUCH

8:30 - 9:15 A. Bloch (Ohio State), *The dynamics of gradient and Hamiltonian flows and convexity**

9:15 - 9:35 J. Bartholdi (Georgia Tech), *A production line that balances itself*

9:35 - 9:55 P. Worfolk (Cornell), *Instant chaos*

9:55 - 10:45 Poster session 3

CHAIR: EMILY STONE

10:45 - 11:30 J. Yorke (Univ. of Maryland), *Numerical trajectories of chaotic systems**

11:30 - 11:50 M. Isichenko (Univ. of Texas, Austin), *Hamiltonian attractors*

11:50 - 12:10 A. Hanslmeier (Univ. of Graz, Austria), *Pattern formation and turbulence in the solar atmosphere*

12:10 - 1:15 Lunch

CHAIR: BOB BEHRINGER

1:15 - 2:00 J. Carlson (Univ. of California, Santa Barbara), *Self-organized criticality: applications of singular diffusions**

2:00 - 2:45 J. Socolar (IBM and Duke), *Origins of long range correlations in 1D sandpiles**

*Invited Speaker

DYNAMICS DAYS INFORMATION SHEET

Registration desk and message board: Located in the ballroom lobby, the registration desk will be open from 7:30 a.m. until 5:00 p.m. each day. A message board is located in the ballroom lobby. To leave a message for a conference participant, call the hotel switchboard and ask for the Dynamics Days registration desk. Pay telephones and restrooms are located in the southeast corner of the ballroom lobby.

Posters and preprints: Poster boards and preprint tables are located adjacent to the main ballroom. This room will be open until 9 p.m. each day. Posters may be set up on Tuesday evening and should be taken down by Saturday morning.

Book displays: All books are located in the Dolores Room, which will be open until 6 p.m. on Wednesday, Thursday and Friday. The following publishers are represented:

<i>Springer-Verlag</i>	<i>Elsevier</i>	<i>World Scientific</i>
<i>Addison-Wesley</i>	<i>IOP Publishing</i>	<i>Marcel Dekker</i>
<i>Gordon & Breach</i>	<i>MIT Press</i>	<i>American Institute of Physics</i>
<i>Society for Applied & Industrial Mathematics</i>		

Wind tunnel tours: Tours of the ASU Wind Tunnel Facility, run by Prof. William Saric, will be held on Thursday afternoon from 1 to 3 o'clock. If you are interested, please sign up on the roster located next to the message board. Vans will depart from the hotel lobby at approximately half-hour intervals. The tour will take about 30 minutes.

Short course luncheon: A buffet lunch will be served to all participants in the short course on Tuesday, January 5 in the Mission Room.

Refreshments: Coffee and soft drinks will be served during the breaks each morning and afternoon in the ballroom lobby.

Restaurants: The hotel requests that you make reservations if you plan to eat at any of their restaurants in groups of more than four people.

A guide to restaurants in Tempe is included in your conference packet. Additional sandwich shops and a soup and salad bar are located in Tempe Center at the southeast corner of Mill Avenue and University Drive, about 10 minutes' walk from the hotel.

Audiovisual equipment: Two overhead projectors and a 35 mm slide projector will be available at all times. A VHS video projector will be available on Friday, Jan. 8. Please see Robert Hedges if you have slides or videotapes.

Financial aid: If you are receiving travel reimbursement or financial aid, please complete and sign the form included in your conference folder. A check will be mailed to you in 2 to 4 weeks.

Banquet: A cash bar will be located in the ballroom lobby from 5:45 to 6:45 on Thursday afternoon. The banquet will be held in the Cloister Room at 6:45 p.m. Unfortunately, Allan Bromley had to cancel his talk at the last minute, so there will not be a session on Thursday evening following the banquet.

Useful telephone numbers:

Mission Palms: (602) 894-1400 (voice); (602) 968-7677 (fax)

ASU Mathematics department: (602) 965-3951

Revised Poster List

Additions and corrections

January 7, 1993

The posters below replace the ones in the original list:

28. Jim Hanson (Berkeley), *Chaotic pattern bases for cellular automata*
60. Akhtar Khan (Univ. of Southern Mississippi), *Traveling fronts of addition polymerization*
90. Gjaja, Ivan (Univ. of Maryland), *Convergence of an infinite product of Lie transformations*
92. Dmitry Gupalo (Rockefeller Univ.), *Symmetry of the Lyapunov spectrum*
93. Manfred Lücke (Saarbrücken), *The effect of amplitude variations on phase dynamics*
94. Steve Hammel (NSWC), *Strange nonchaotic attractors and the quasiperiodic Ikeda map*
95. Pat Carter (NSWC), *Geometry of time series using wavelets*
96. Xiaogin Zou (U.C. San Dieto), *Standing waves in catalysis at single crystal surfaces*

Corrected title for number 52.: *Stochastic chaos: an analogue of quantum chaos*

New poster 77 which will be presented Thursday afternoon, Jan. 7:

Jim Swift (Northern Arizona Univ.), *Unfolding the torus: oscillator geometry from time delays*

Poster 10 (corrected title): *Dimension and entropy analysis of experimental systems using the DSD method*

Schedule change for Thursday morning, Jan. 7:

Michael Isichenko will speak from 10:30–11:50.

John Bartholdi will speak from 9:15–9:35.
